EFFICIENT. ECONOMICAL. ECO-FRIENDLY *by Janico*

### MICROFIBER WET MOP PADS

- Microfiber works electro-statically so dust and dirt are attracted directly to the mop pad. The accumulated dirt is held tightly within the pad and not redistributed around the room during cleaning.
- These Microfiber Wet Mops contain a 100% microfiber filler which is more resistant to bacteria than other fiber-filled microfiber wet mops, reducing cross contamination.
- Constructed from 80% polyester and 20% polyamide synthetic.
- Color coding available.
- 18" size is ideal for restrooms and other small areas.
- 24" is recommended for hallways, offices and other large work areas.

### LOOPED WET MOP PADS

- Mop glides easily across most floor surfaces.
- Ideal for many types of floors – high gloss, marble, tile and wood
- Excellent absorbency and leave floors streak free.

# THE BENEFITS OF MICROFIBER USE

Microfibers have created a little revolution in the cleaning world, its impact besides being labor saving and cost saving, is environmental friendly. Microfibers cleaning products are precision cleaning tools with remarkable efficiency that allow cleaning on a microscopic scale. Thus, according to tests, using microfiber materials to clean a surface leads to reducing the number of bacteria by 99% while a conventional cleaning material reduces this number by only 33%.

Ordinary loop mops use a large amount of water to mix up with the cleaning products to be efficient. Microfiber mops require a negligible quantity of water and still is more efficient in getting the job done. As for laundering, microfiber mops are easier to launder and do not require specific washing machine and cleaning products. Taking much less space in washers and dryers, they also reduce the use of water, detergent and energy.

Recycled plastic products are used to produce microfiber which in turn can be recycled.

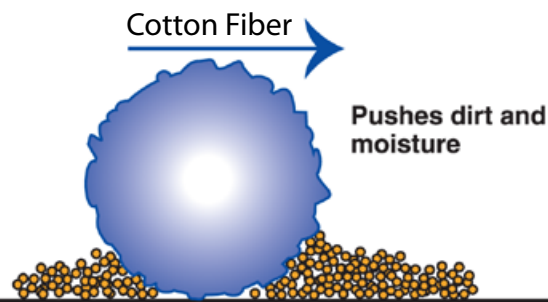

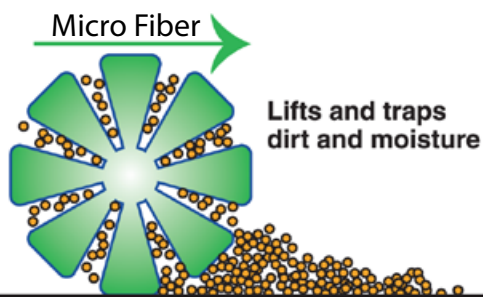

## MICROFIBER CLEANING BENEFITS

- Scoops and traps dirt.
- Holds 6-7 times its weight in liquid.
- Can be laundered hundreds of times.
- Spreads product smoothly and evenly onto surfaces.
- Color coded options available.
- Lint Free.
- Non-abrasive.
- Hypo-allergenic.
- Moves easily across surfaces.
- Floors dry quicker.

## MICROFIBER GREEN QUALITIES

- Better indoor air quality is achieved by superior dust and dirt containment.
- Source reduction – less water and chemicals usage.
- Lasts longer than conventional products.
