

Are **IMPORTS** Driving You **CRAZY**?

We have the **DOMESTIC** solution....

SoftTote™ is an alternative to imported folded bottom shopper bags. Pak-Sher has added capabilities to manufacture this product in our facility in Texas, which ensures that lead times will be shorter than an import bag and guarantee the highest quality standards in the industry. Our printing capabilities remain the same. We can print up to 8 colors total and can process print both sides. There are similar products that on the surface appear to be the same as the SoftTote; however, there are two distinct features that set it apart.

- HDPE (high density polyethylene) handles vs the competition's LDPE (low density polyethylene) handles - HDPE is stronger and has less tendency of the handles sticking together.
- Patent pending square bottom "corner" seal design - the seals will square the bottom of the bag out much like the folded bottom bags in paper or plastic.

Custom sizing available • Dispensers available - #5512

AVAILABLE HANDLE COLORS FOR CUSTOM BAGS
